

SnapScreen Installation Guide

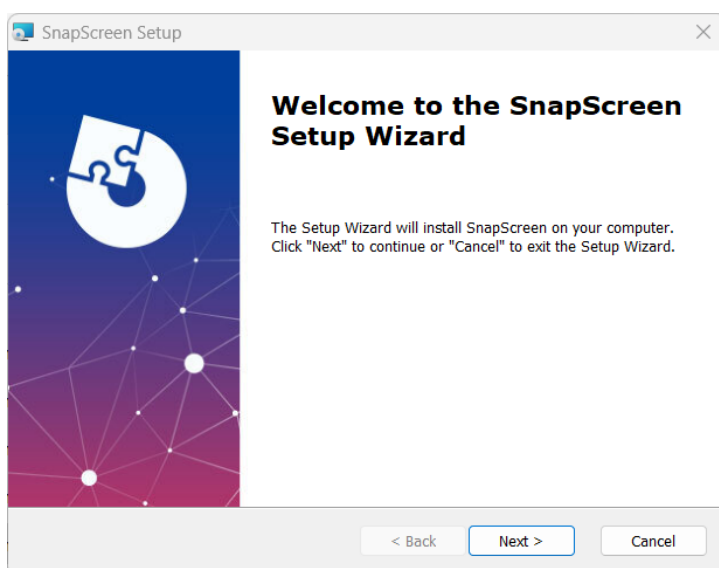

1. Double click on the SnapScreen Installer.

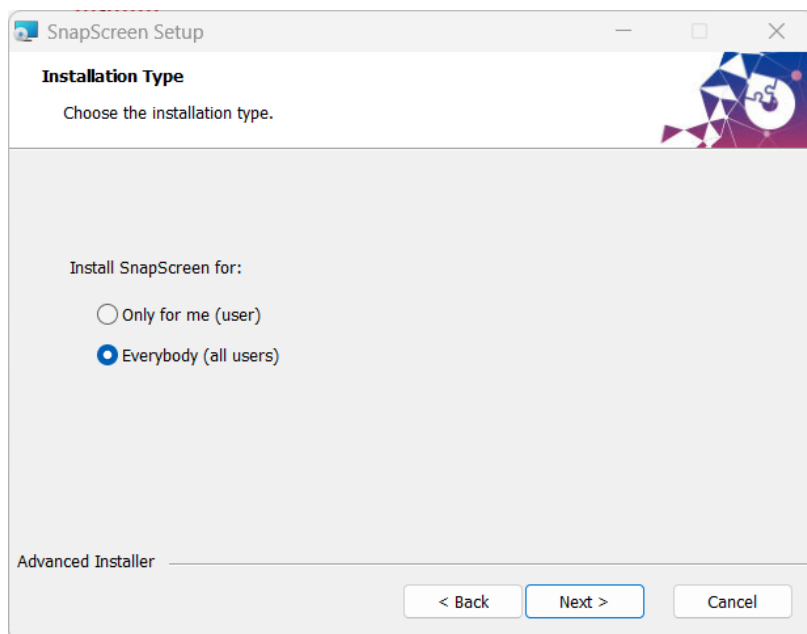

If this window popped up, click “More Info” and then click “Run anyway”

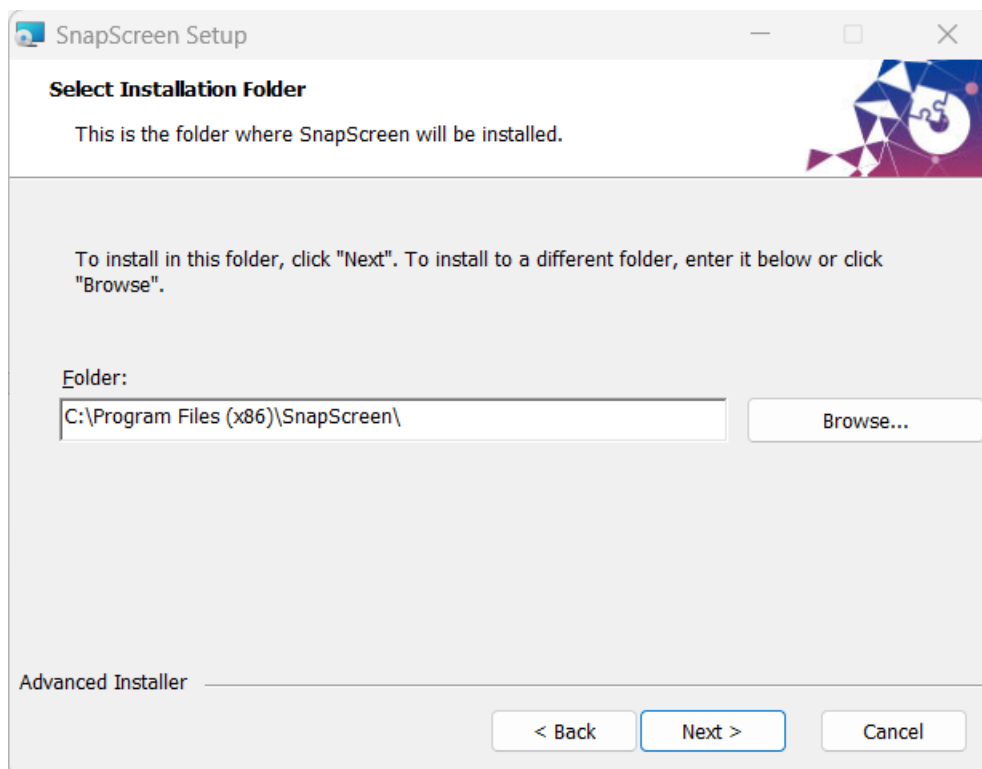

2. Installation wizard welcome page will pop up after you double clicked on the installer. Click Next>

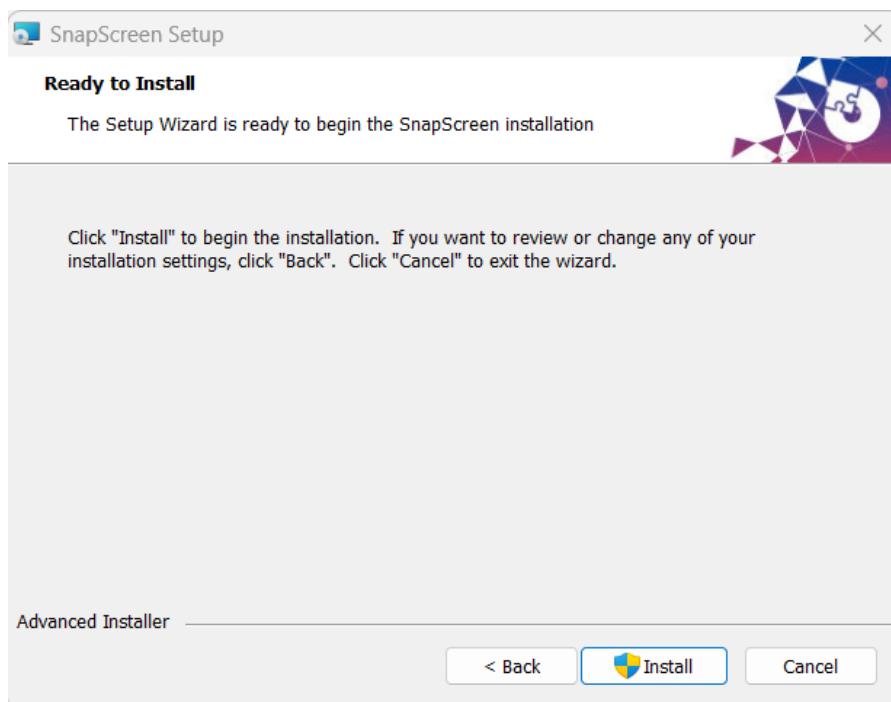

3. Select your preferred installation type. If you have admin access, select all users. Then, click Next>

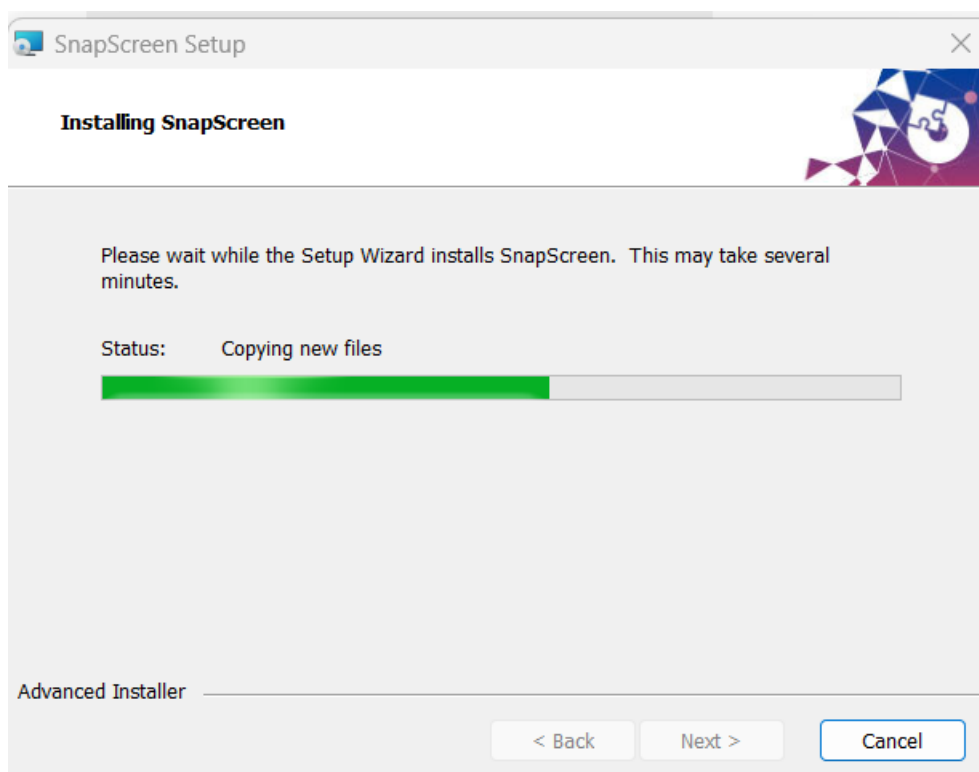

4. Select your desired installation path by clicking the Browse button. Or you can leave it by default. Click Next>

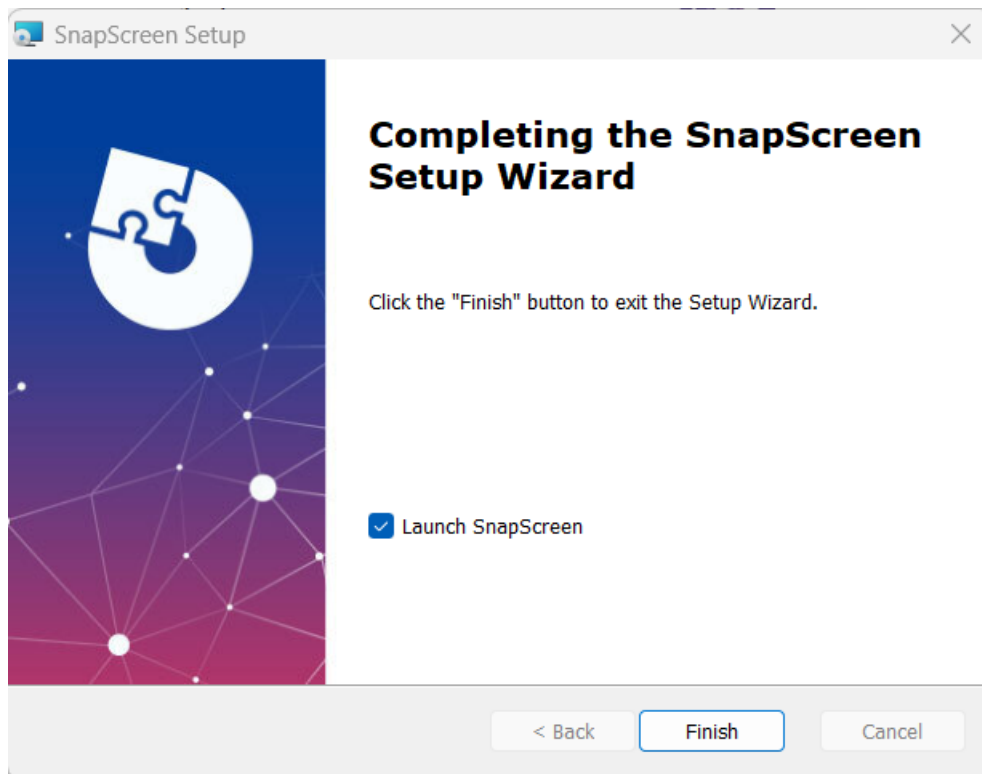

5. Click Install when you are ready to install.

6. Wait until the installation progress completed.

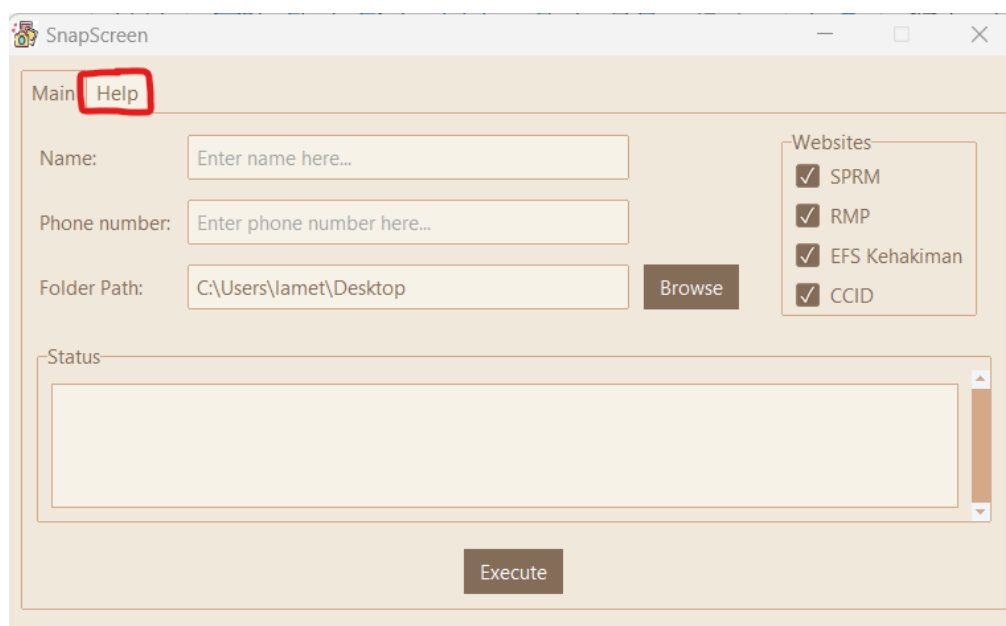

- Click “Finish” after installation is completed. Optional, you can choose if you want to launch SnapScreen upon installation.

Note:

Basic guide on SnapScreen can be found in “Help” tab of the software.

You can scroll through the basic guide and click on the email to be redirected to your outlook to send an email to the developer. Or you can right click on the email to copy the email.
